

Building a Global Uranium Company

**Development of the Tumas Project
in a Resurging Uranium Market**

Corporate Update

**BMO – Global Metals, Mining and
Critical Minerals Conference**

23–26 February 2025

John Borshoff, Managing Director/CEO
Andrew Mirco, Head of Business Development

DYL: ASX / NSX (Namibia)
DYLLF: OTCQX

Disclaimer

This presentation has been prepared by Deep Yellow Limited ABN 97 006 391 948 (Company or Deep Yellow) for general information purposes only. The presentation does not constitute a prospectus or equivalent document nor does it constitute financial product or investment advice. It does not take into account the investment objectives, financial situation or particular needs of any investor.

The presentation is not and should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company, or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation.

The presentation has been prepared by the Company based on information available to it. Due care and attention has been taken in the preparation of this presentation, however the information contained in this presentation (other than as specifically stated) has not been independently verified for the Company or their respective directors and officers, nor has it been audited. Accordingly, the Company does not warrant or represent that the information contained in this presentation is accurate or complete. To the fullest extent permitted by law, no liability, however arising, will be accepted by the Company, or their respective subsidiaries, directors, officers or advisers, for the fairness, accuracy or completeness of the information contained in the presentation. No responsibility or liability is assumed by the Company or their respective subsidiaries, directors, officers or advisers for updating any information in this document or to inform any recipient of any new or more accurate information or any errors of mis-descriptions of which the Company or any of its respective directors, officers or advisers may become aware.

Financial Information

All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. Amounts, totals and change percentages are calculated on whole numbers and not the rounded amounts presented. This presentation includes certain historical financial information extracted from audited consolidated financial statements and information released to ASX (collectively, the Historical Financial Information). The Historical Financial Information is presented in an abbreviated form insofar as it does not include all the presentation and disclosures, statements or comparative information as required by the Australian Accounting Standards (AAS) and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations Act.

Past Performance

Past performance metrics and figures (including past share price performance of the Company), as well as pro forma financial information, included in this Presentation are given for illustrative purposes only and should not be relied upon as (and is not) an indication of the Company or any other party's views on the Company's future financial performance or condition or prospects. Investors should note that past performance of the Company, including in relation to the historical trading price of the Company's shares, mineral resources, costs and other historical financial information cannot be relied upon as an indicator of (and provides no guidance, assurance or guarantee as to) future performance, including the future trading price of shares in the Company. The historical information included in this Presentation is, or is based on, information that has previously been released to the market.

Forward Looking Statements

This presentation contains "forward-looking information" that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the pre-feasibility and any feasibility studies, the Company's business strategy, plan, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this presentation are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. There can be no assurance that actual outcomes will not differ materially from forward-looking statements. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors which are subject to change, including but not limited to general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of uranium; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accident, labour disputes and other risks of the mining industry; and delays in obtaining governmental approvals or financing or in the completion of development or construction activities.

Disclaimer

This list is not exhaustive of the factors that may affect the Company's forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. The Company disclaims any intent or obligations to finalise, check, update or revise any forward-looking statements, whether as a result of new information, estimates, options, future events or results or otherwise, unless required to do so by law. Statements regarding production targets and plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

Competent Person Statements - Previously reported information

This Presentation contains estimates of Mineral Resources, Ore Reserves, Production Targets and Exploration Results of the Company.

The information as it relates to exploration results, Mineral Resource and Ore Reserve estimates of the Namibian projects is based on and fairly represents, information and supporting documentation that was compiled by Martin Hirsch, a Competent Person who is a Professional Member of the Institute of Materials, Minerals and Mining (UK) and the South African Council for Natural Science Professionals. Mr Hirsch, who is currently the Manager, Resources & Pre-Development for RMR, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves.

Mr Hirsch consents to the inclusion in this presentation of the matters based on the information in the form and context in which it appears. Mr Hirsch holds shares in the Company.

Where the Company refers to its Australian projects and references exploration results, Mineral Resource and Ore Reserve estimates and ASX Announcements made previously it confirms that the relevant JORC Table 1 disclosures are included with them and that it is not aware of any new information or data that materially affects the information included in those ASX Announcements and in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the Announcements continue to apply and have not materially changed.

All prior announcements are available on the Company's website at www.deeptyellow.com.au/investor-centre/asx-announcements/.

Rounding

A number of figures, amounts, percentages, estimates, calculations of value and fractions in this Presentation are subject to the effects of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this Presentation.

Best Positioned Uranium Mid-Cap Company Globally

Globally Diverse

Two long-life advanced projects **located in two Tier-1 mining jurisdictions** – will provide diversity, security and longevity of supply – key requirements for Offtakers, Investors and Lenders

Near Term Production

Positioned to deliver uranium in the near term – Tumas targeting FID March 2025, commenced construction of infrastructure & long lead items, production late 2026

Proven Team

Highly experienced uranium team – extensive knowledge across development, operational lifecycle, offtake, environment and project finance. The Deep Yellow team builds long-life, tier-one uranium mines

Development Strategy

Two advanced projects developed sequentially – followed by either development of significant exploration pipeline and/or M&A

High Value Pipeline

Alligator River Project (100%), Northern Territory – covers 3,895 km² and located in a world class uranium province. **Omahola Project** (100%), Namibia, located in Alaskite Alley, an extension to the same geological trend of the Husab deposit

Uranium Demand and Supply Equation – In Total Mismatch

NUCLEAR DEMAND – over past 18 months

DEMAND ABSOLUTELY BOOMING

- **China** – maintaining strong growth projection
- **EU** – overwhelming support
- **India** – expected to be third largest global economy by 2027 – nuclear energy integral part of growth
- **SE Asia** – major turnaround
- **North America** – an awakened giant
- **Middle East** – pursuing nuclear with intent
- **Data Centres/AI** – even with apparent Chinese breakthrough, astonishing growth needing immediate additional power with preference for nuclear required

URANIUM SUPPLY – over the past 18 months

SUPPLY ABSOLUTELY IN DOLDRUMS

- Supply sector has been in decline for over a decade
 - now unprepared and highly under capitalised
 - talent drain across the sector will create difficulties
- Kazatomprom growth aspirations stalled
- Cameco state unwilling to start greenfield projects at current term prices
- Mothballed operations starting up are only replacing diminishing underfeed material
- Future supply growth totally dependent on greenfield projects
 - few shovel-ready projects of significance available

**THE BIG PICTURE THAT UTILITIES SIMPLY DON'T GET (YET!) – AN UNSUSTAINABLE SITUATION.
URANIUM PRICE MUST INCREASE MATERIALLY TO ACHIEVE EVENTUAL RE-BALANCE**

Deep Yellow with proven history of its team is one of the few developers who able to provide new production and security of supply with geographic diversity

Zero Emission Targets and Increasing Electricity Needs **Cannot** be met Without Abundant Nuclear

World Electricity Production by Source¹

World electricity production breakdown excludes current and future impact of unplanned Data Centre and Gen AI growth estimated to need 10%-16% additional clean electrical energy by 2030

Total Global Energy Equation

Still 85% fossil fuelled!

A Top 10 Performer in the ASX200 for FY24

Uniquely Positioned with Best-in-Class Team

Globally Diversified with Two Advanced, Long-Life Projects

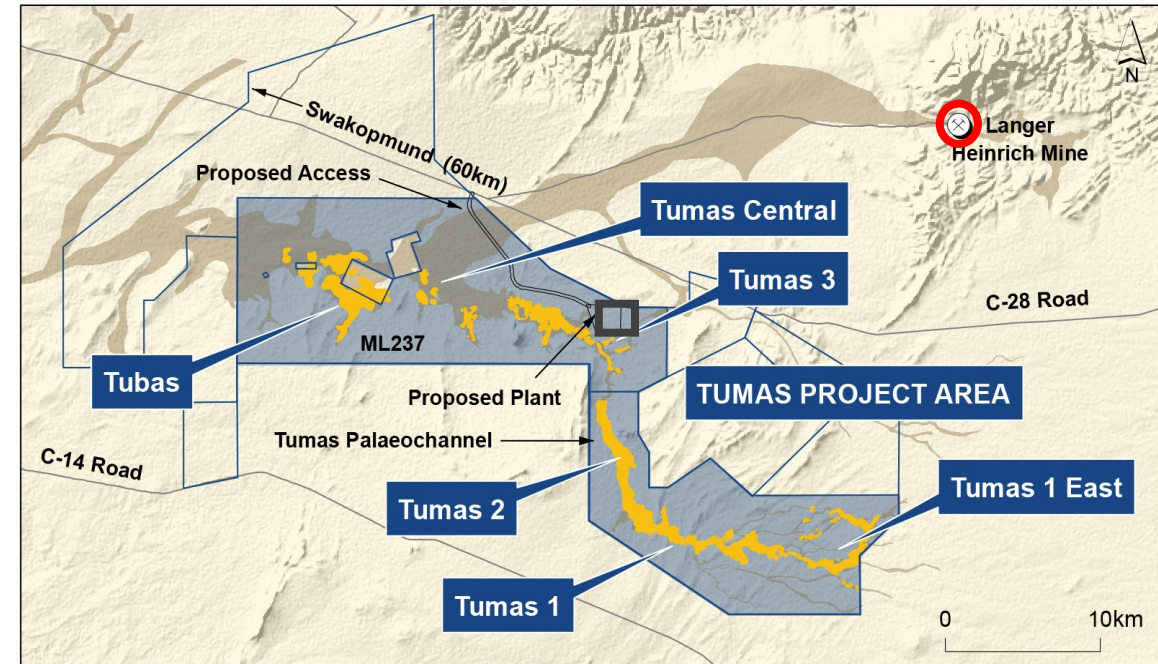

- Project portfolio provides diversity by asset, stage of development and geographic location
- One of the largest uranium resource bases of any ASX-listed company **(430 Mlb)**
- Uniquely positioned as one of the few uranium companies globally able to execute to development and production, with credible multi-mine asset exposure

Note: Resource & Reserve metrics reported on a 100% basis

Flagship Tumas Project, Namibia

- Uranium and mining friendly jurisdiction. **20-year Mining Licence granted, effective September 2023**
 - Allows the Project to progress towards production, **establishing Tumas as the 4th uranium mine in Namibia**
- Ore Reserves of 79.5 Mlb – **30-year LOM achieved**
- **Annual Production 3.6 Mlb**
- DFS completed January 2023. **Re-Costing Study completed in December 2023⁽¹⁾**
 - Results strengthen Project as a a long-life, world-class uranium operation
- **Potential to extend LOM to 35-40 years**
 - Inferred Resources of 30.8 Mlb available to further expand Ore Reserve base
 - 25% of prospective channel remains to be tested
- **Ausenco** selected for Detailed Engineering/EPCM contracts
- Project supported by:
 - grid power
 - existing water supply

-  Ex-Paladin Core Team now with Deep Yellow – established and operated Langer Heinrich
-  Tumas processing plant location

Note: Deep Yellow currently owns 100% of Tumas. Oponona (local Namibian partner) has a right to acquire 5% of the project. (1) Refer ASX announcement 12 December 2023

Tumas Project – Development Update

- FID consideration deferred until March 2025
 - delayed costings and quotes for equipment and construction, **and further project optimisation opportunity identified**
 - confirming a robust advanced greenfield uranium development project
- Early works on non-process infrastructure continuing
- Draft offers received and accepted for the supply of both water and power
 - contracts being finalised for execution
- Commencement of Tumas plant construction remains dependent on sufficient term price incentivisation for greenfield project start-up
- Debt financing arrangements advancing with strong indicative support from potential lenders

Wide haul road constructed with 100 mm gypsum running board

EMED containerised temporary medical facility.

Elspe Quarry stockpiled borrow material

Mulga Rock East – an expanded opportunity

- Extensive resource/reserve upgrade and ore variability drilling programs completed August 2023
- **Significant uranium, critical minerals (Cu, Ni, Co, Zn) and magnetic rare earth elements (notably Nd/Tb/Dy/Pr) resources identified**
- Updated MRE to Measured/Indicated status released to ASX 26 February 2024 with strong results
- Parallel metallurgical and hydrogeological workstreams well advanced and progressing as planned
 - Large diameter core drilling commenced for advancing resin pilot testwork

Class	PREVIOUS MRE			UPDATED MRE				
	Tonnes (Mt)	U ₃ O ₈		Tonnes (Mt)	U ₃ O ₈		U ₃ O ₈ Eq*	
		(ppm)	(Milb)		(ppm)	(Milb)	(ppm)	(Milb Eq)
Total	38.2	673	56.7	81.2	400	71.2	590	105.3

*U₃O₈ Equivalent (U₃O₈Eq) = U₃O₈ + 0.093xCo + 0.028xCu + 0.074xNi + 0.118xREO + 0.009xZn
Refer Appendix 1

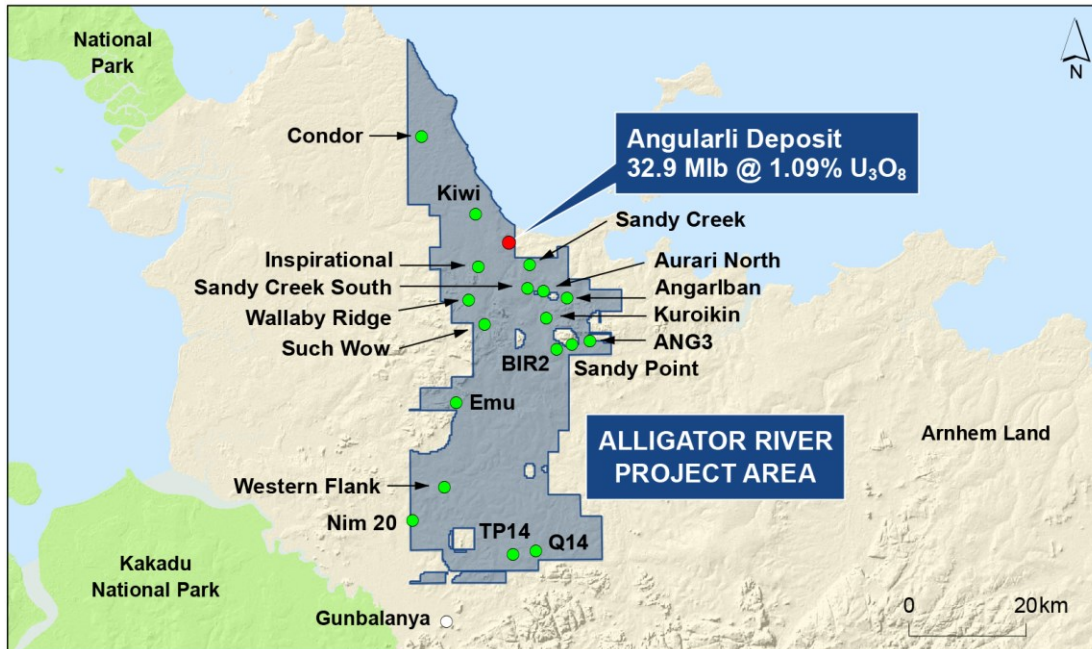

Opportunity to develop Mulga Rock into a polymetallic operation, expanded 25 year + Life of Mine potential with significant increase to project value and strategic importance

Exceptional Exploration Upside

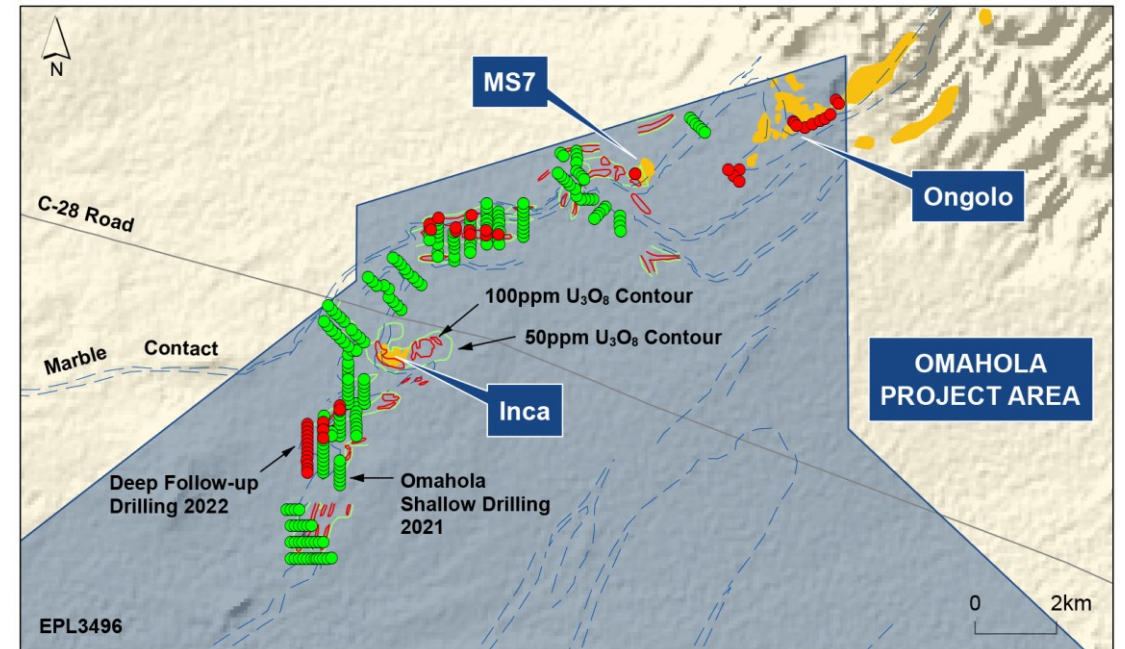

ALLIGATOR RIVER PROJECT, NORTHERN TERRITORY – 100%

- Located in the world-class uranium province of Alligator River, which hosts some of the highest-grade uranium deposits in the world (unconformity-related, Athabasca-style)
- Support from Traditional Owners
- Angularli Mineral Resource – 32.9 Mlb @ 1.09% U_3O_8
- Potential for discovery of large, >100 Mlb uranium deposits

OMAHOLA BASEMENT PROJECT, NAMIBIA – 100%

- Measured, Indicated and Inferred Resource base of 125.4 Mlb at 190 ppm U_3O_8 across-Ongolo, MS7 and Inca deposits¹
- 35 km prospective zone, with strong potential for additional discoveries
- Shallow drilling program of ~200 holes for 7,100 m identified 3 highly-promising targets for follow up
- 50% of basement prospective zone remains to be tested

¹Refer to ASX announcement dated 4 November 2021

Two Substantial, Advanced Uranium Projects to Produce +7 Mlb

- ✓ **Tumas** – DFS complete, FID March 2025 – aiming for production late 2026
- ✓ **Mulga Rock** – Post-acquisition revised DFS completion mid 2026 based on new project parameters

Deep Yellow has two advanced projects, with development schedules identified, ready to capitalise on higher uranium prices

(1) Deep Yellow currently owns 100% of Tumas. Oponona (local Namibian partner) has a right to acquire 5% of the project

Key Workstreams and Anticipated Timing

TUMAS PROJECT Namibia	MULGA ROCK Western Australia	ALLIGATOR RIVER Northern Territory	M&A
<ul style="list-style-type: none"> • Q4 2024 – Early works commenced on non-process infrastructure • Q1 2025 – Project finance proceeding • Late Q1 2025 – Final Investment Decision consideration • Q1 2025 – Grade control completed for 6 yr mining plan • Q1 2025 – Offer of supply of water and power accepted • 2H CY26 – Maiden Tumas production 	<ul style="list-style-type: none"> • Q4 2024 – Completion of the non-selective mining study • Q1 2025 – Completion of resin pilot testwork to optimise efficiency in critical mineral and rare earth element capture • Q2 2025 – Completion of Ambassador hydrogeological study • Q3 2025 – Completion of revised mining study • Mid CY 2026 – Completion of revised DFS, incorporating new inputs for uranium and non-uranium value uplift 	<ul style="list-style-type: none"> • Q1 2025 – Geological surveys evaluation ongoing with focus on newly defined prospective corridors • Q2 2025 – Completion of 5-year exploration plan to unlock value • Q2 2025 – main drilling program commences testing prospective corridors 	<ul style="list-style-type: none"> • Ongoing – Continued focus on accretive consolidation to develop larger scale, with high quality mining assets
<p style="text-align: center;">Target Production 2026</p>	<p style="text-align: center;">Target Production 2028</p>	<p style="text-align: center;">Target Production +2030</p>	<p style="text-align: center;">Target Production +2030</p>

Best Positioned Pure-Play Uranium Investment

Deep Yellow is successfully establishing **the right platform at the right time ready to build greenfield projects when the price is right**

Uranium market backdrop creates exceptional opportunities **in the post-Fukushima supply reconstruction era and taking advantage of an assured supply shortage further exacerbated by a bifurcated market**

Experienced Board and proven leadership supported by executive and technical teams **strong across all operational, financial and governance domains**

Strong financial position with A\$238.4M cash (A\$246M including cash equivalents) to initiate development of Tumas and pursue growth strategy

On a pathway to becoming a leading, reliable and long-term uranium producer, **able to provide production optionality and security of supply with geographic diversity**

Thank you

Appendix 1

Uranium Equivalents

U₃O₈Eq grades are calculated as follows:

$$U_3O_8Eq = U_3O_8 + 0.093xCo + 0.028xCu + 0.074xNi + 0.118xREO + 0.009xZn$$

- Those factors were calculated using the assumptions presented in the table below and, based on testwork completed to date, the Company believes that all the critical minerals (Co, Cu, Ni, Zn, REO) can be recovered and a saleable product can be produced for each relevant element.
- Long-term price assumptions were derived using TradeTech® proprietary FAM2 supply/demand scenario (2023 Q3) for uranium oxide and cost curves-based (~ 75% percentile) or consensus analyses for cobalt, copper, nickel and zinc.
- Analysis of price variations for critical minerals indicates minimal change in the resulting U₃O₈Eq cut-off grade.
- Long-term (**LT**) prices for REO were assigned using independent long-term prices derived from a composite of industry specialists (based on individually modelled 20-year prices for individual REOs).
- Only Magnetic Rare Earth Oxides (**MREO**, or the sum of Dy₂O₃, Nd₂O₃, Pr₂O₃ and Tb₂O₃), which account for about 35% of the total REO by weight and approximately 90% by value at the MRP, were assigned a value for equivalent grade reporting purposes.

Mulga Rock East – Uranium Equivalent Grade Reporting Assumptions

Element	U ₃ O ₈	Co	Cu	Ni	REO	Zn
Price Assumption (US\$/t)	187,423	35,000/t	9,000	22,000	65,201 ¹	2,500
Recovery ²	93%	57%	68%	72%	55%	74%
Payability	98%	85%	85%	85%	60%	85%

¹ LT Price assumption of US\$65,201/t if expressed as the sum of MREO grades.

² Combined physical beneficiation and leach extraction.

Appendix 2(a) Namibian Mineral Resources

Notes:

- Figures have been rounded and totals may reflect small rounding errors.
 - XRF chemical analysis unless annotated otherwise.
 - # Combined XRF Fusion Chemical Assays and eU_3O_8 values.
 - ◆ eU_3O_8 - equivalent uranium grade as determined by downhole gamma logging.
 - Where eU_3O_8 values are reported it relates to values attained from radiometrically logging boreholes.
 - Gamma probes were originally calibrated at Pelindaba, South Africa in 2007. Recent calibrations were carried out at the Langer Heinrich Mine calibration facility in July 2018, September 2019, December 2020, January 2022, February 2023 and August 2024.
 - Sensitivity checks are conducted by periodic re-logging of a test hole to confirm operations.
 - During drilling, probes are checked daily against standard source.
