- Attributable Mineral Resource base of 431 Mlb U₃O₈.
- Once in production, Deep Yellow will be the largest pure-play uranium producer on the ASX.
- Potential production capacity at Tumas of 3.6 Mlb pa and at Mulga Rock of 3.5 Mlb pa. Significant growth upside through Omahola and Alligator River Projects.
- Operating across two Tier-1 mining jurisdictions.
- Delivering on vision - 7 years successfully establishing a Tier-1 uranium platform with next 5 years focusing on execution to production while further growing the global resource base.
- June 2024, included in S&P/ASX 200 Index, ranking in top 10 for FY24¹.

Mulga Rock Project

Granted Mining Lease and only uranium project in Western Australia to reach "Substantial Commencement" opening pathway to development.

DFS completed by Vimy Resources Limited (Vimy) (the previous owners) in 2018, with results highlighting a potential world-class operation. On acquisition of Vimy, Deep Yellow identified a significant opportunity for value uplift to be captured through an updated DFS underway. The opportunity is to recover additional uranium and critical metals – Ni, Co, Cu, Zn, REE – not previously considered.
