## MIRANDA PROSPECT DRILLING – UPDATE

The Directors of Deep Yellow (DYL) are pleased to announce that they have received highly encouraging assay results for about half the samples from the RC percussion drill programme now completed on the Miranda Prospect, 75 km northeast of Mt Isa, Queensland.

**The Directors consider that some of the wider intercepts returned indicate that the Miranda Prospect has tonnage potential and that further drilling in the 2008 field season is warranted.**

Most significant wide intercepts include:

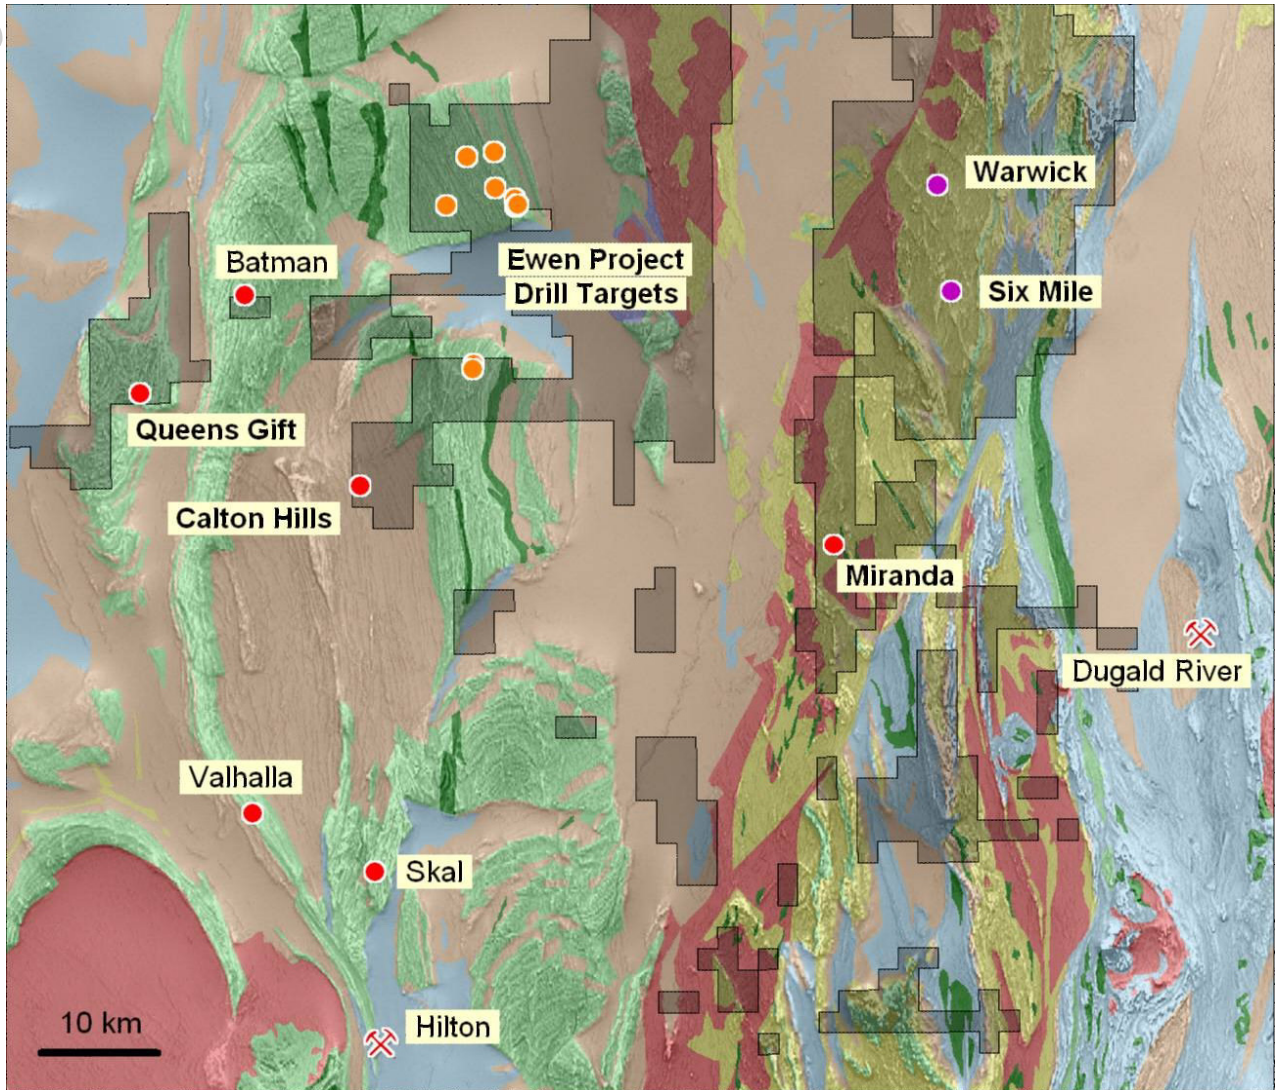

- Hole DMRC-0008 32 m at 625 ppm U<sub>3</sub>O<sub>8</sub> from 3 m
- Hole DMRC-0009 25 m at 654 ppm U<sub>3</sub>O<sub>8</sub> from 14 m

The drill programme totalling 16 holes for 1,962 m was carried out on three sections over 100 m strike of the outcropping area of the Miranda radiometric anomaly as follow-up to DYL's 2006 drill holes, DMRC-0001 (12 m at 960 ppm U<sub>3</sub>O<sub>8</sub> from 9 m) and DMRC-0002 (3 m at 730 ppm U<sub>3</sub>O<sub>8</sub> from 43 m.) The Miranda Prospect is located on EPM14281 which is subject to the NW Queensland JV with Matrix Metals Ltd.

### Miranda Prospect – Significant Intercepts

Drillhole	From	To	Width	U <sub>3</sub> O <sub>8</sub> ppm
DMRC 0006	64	81	17	520
DMRC 0008	3	35	32	625
Incl.	28	33	5	1,590
DMRC 0009	14	39	25	654
Incl.	16	26	10	1,124
DMRC 0010	38	48	10	591
DMRC 0011	14	16	2	925
and	28	31	3	883

The drilling rig is now en route to the Ewen Project to commence evaluation of the airborne and ground radiometric survey targets as outlined in the September Quarterly report.
