Limited

#### Mines and Money Hong Kong 2012

#### Investor Presentation

20th March 2012

**Greg Cochran – Managing Director** 

ASX: DYL www.deepyellow.com.au

#### Disclaimer

#### **Forward Looking Statements**

This presentation has been prepared by Deep Yellow Limited ("Deep Yellow"). The information contained in this presentation is of a general nature only and does not constitute and offer to issue, or to arrange an issue, of securities or financial products. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. This presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person.

Before making an investment decision on the basis of this presentation, the investor needs to consider, with or without the assistance of a financial advisor, whether the investment is appropriate with due regard for their particular investment needs, objectives and financial circumstances.

This presentation is based on company stock exchange announcements, stockbroker research and technical information believed to be reliable. To the maximum extent permitted by law, none of Deep Yellow's Directors, employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation nor is any obligation assumed to update such information. In particular, no representation or warranty, express or implied, is provided as to its accuracy, completeness or currency of the information contained in this presentation. Deep Yellow accepts no obligation to correct or update the information or opinions expressed in it. Opinions expressed are subject to change without notice and reflect the views of Deep Yellow at the time of presenting.

#### Overview & Vision

- Corporate Profile
- 2011 Highlights
- 2012 Objectives
- Namibian Projects
  - Omahola
  - Tubas-TRS
  - Shiyela Iron
- Conclusion

Commence uranium production in Namibia in 2015 and continue to successfully grow our uranium resource base

### Corporate Profile

#### The Board

Mervyn Greene – Chairman

Greg Cochran – Managing Director

Martin Kavanagh – Executive Director

Gillian Swaby – N.E.D

Rudolf Brunovs – N.E.D (independent)

Mark Pitts – Company Secretary

#### **Executives & Management**

**Greg Cochran** – Managing Director

Martin Kavanagh – Executive Director

**Leon Pretorius** – MD: Namibia

**Ursula Pretorius – Financial Controller** 

Klaus Frielingsdorf – GM: Technical

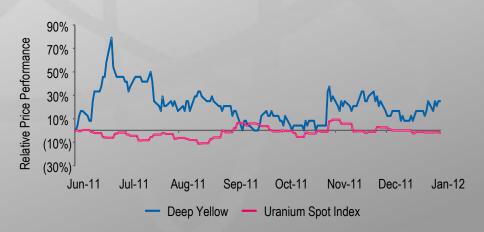

Mark Pitts - Company Secretary

#### Capital Structure – as at 28 Feb 2012

Shares on Issue	1,128.74 M
<b>Unlisted Options/Perf. Rights</b>	13.78 M
Market Cap (@ 13c)	~ 147 M
Net Cash	~5.6 M
Major shareholders:	
Paladin Energy	19.9%
Board & Management	15.7%

#### DYL Share Price vs. Uranium Spot

Relative Price Performance - DYL v. Uranium Price (20 Jun '11 - 20 Jan '12)

#### 2011 Results

- Omahola Project
  - PFS interim results released
  - Resource increased by ~24 Mlbs
  - Grade increased by ~9% to 441 ppm U3O8
  - INCA EIA and Mining Licence Application (MLA) submitted
- Tubas-TRS Project:
  - Successful Physical Beneficiation Trials
  - EIA and Mining Licence Application (MLA) submitted
- Shiyela Iron Project
  - Shiyela Resource and Scoping Study completed
  - EIA and Mining Licence Application submitted

An Outstanding Year of Achievement

## 2012 Objectives

- Omahola Project:
  - Continue to expand Ongolo & MS7 Resource Base
  - Achieve Resource Critical Mass for Project (>50 Mlbs)
  - Ongolo Scoping EIS & Finalise Pre-Feasibility Study
- - Upgrade Resource
  - Stand Alone Option Pre-Feasibility Study
- Shiyela
  - Large diameter drilling for Pilot Plant Testwork
  - Metallurgical Testwork to Improve Recovery
  - Partner Search for Funding and Feasibility Study

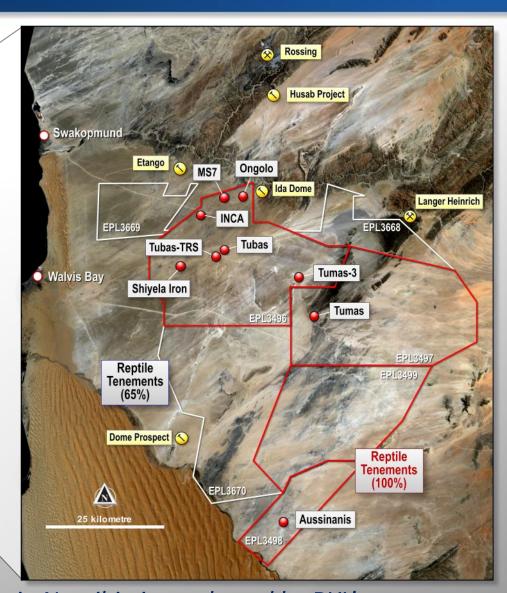

A multi-project company rapidly advancing its projects towards development

### Namibian Tenements – Reptile Uranium\*

4,195 km<sup>2</sup> exploration area: 101.4 Mlbs in resources

\*Note: Exploration in Namibia is conducted by DYL's wholly-owned subsidiary Reptile Uranium Namibia (RUN)

## Namibian Advanced Stage Projects

#### **OMAHOLA PROJECT**

ONGOLO & MS7 ALASKITE	INCA URANIFEROUS MAGNETITE
JORC resource: 23.6 Mlbs	JORC resource: 13.4 Mlbs
Primary mineralisation	Primary mineralisation
Open Pit Hard rock – Drill & blast	Open Pit Hard rock – Drill & blast
Acid plant treatment	Acid plant treatment
Grade/Cut-off: 416 ppm/250 ppm	Grade/Cut-off: 490 ppm/250 ppm

#### Three deposits feeding a central plant

#### **TUBAS-TRS PROJECT**

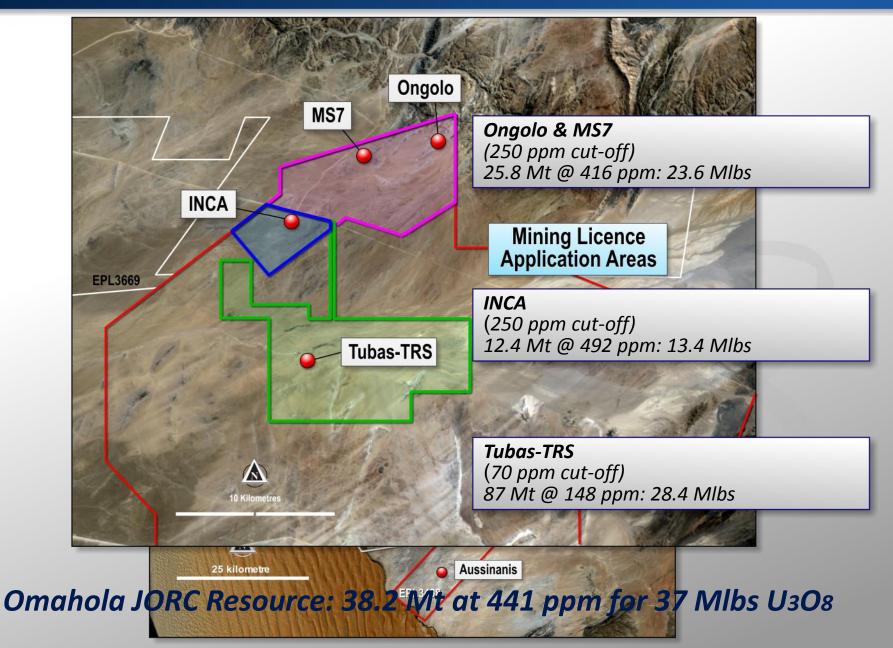

TUBAS-TRS DEPOSIT
JORC resource: 28.4 Mlbs
Secondary mineralisation
Shallow wind blown sand deposit
Free dig/physical beneficiation
Acid or alkali plant treatment
Grade/Cut-off: 148 ppm/70 ppm

#### SHIYELA IRON PROJECT

SHIYELA IRON DEPOSIT
Mineralisation: Magnetite/Hematite
Open Pit Hard rock – Drill & blast
Drilling completed mid-2011
Scoping Study Completed 2012
Capex: U\$467 M Opex: U\$78/t
78.7 Mt @ 18.9% Fe, 16.2% DTR

### Omahola & Tubas-TRS Project Locations

### Omahola Project Overview

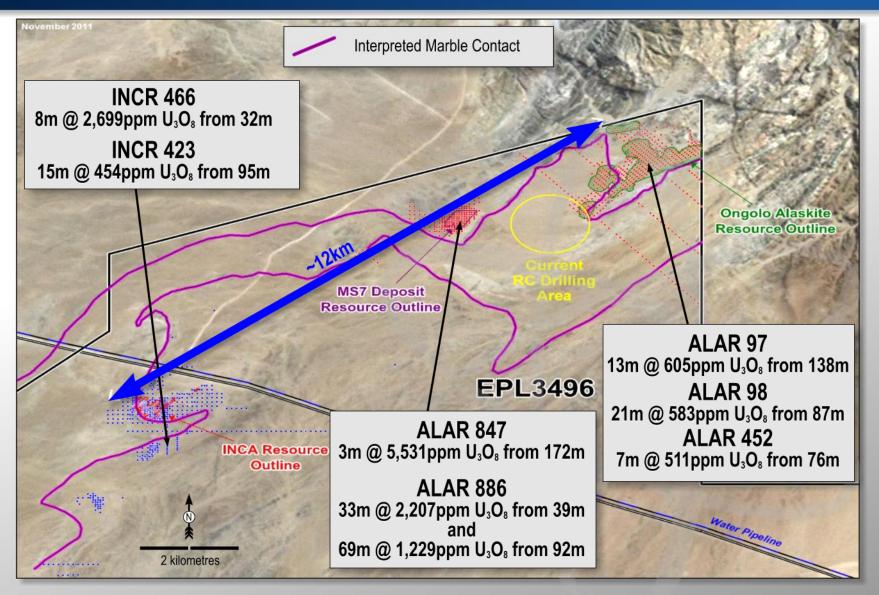

- Three Deposits feeding One Plant:
  - Ongolo High grade alaskite hosted uranium mineralisation
  - MS7— Ongolo Satellite, high-grade alaskite hosted uranium mineralisation
  - INCA Unique high grade uranium, magnetite and pyrite mineralisation
- Hard Rock Resource:
  - 38.2 Mt @ 441 ppm for 37 Mlbs
- Interim PFS Results on INCA/TRS Deposits (SNC-Lavalin)
  - 2.2 Mlbs pa operation
  - Minimum 12 year mine life
  - Open pit / Surface Mining
  - Conventional acid based processing plant
  - Capex: ~US\$330 M & Opex: ~US\$30/lb

Rapidly approaching critical mass....

## Omahola Project Exploration Success...

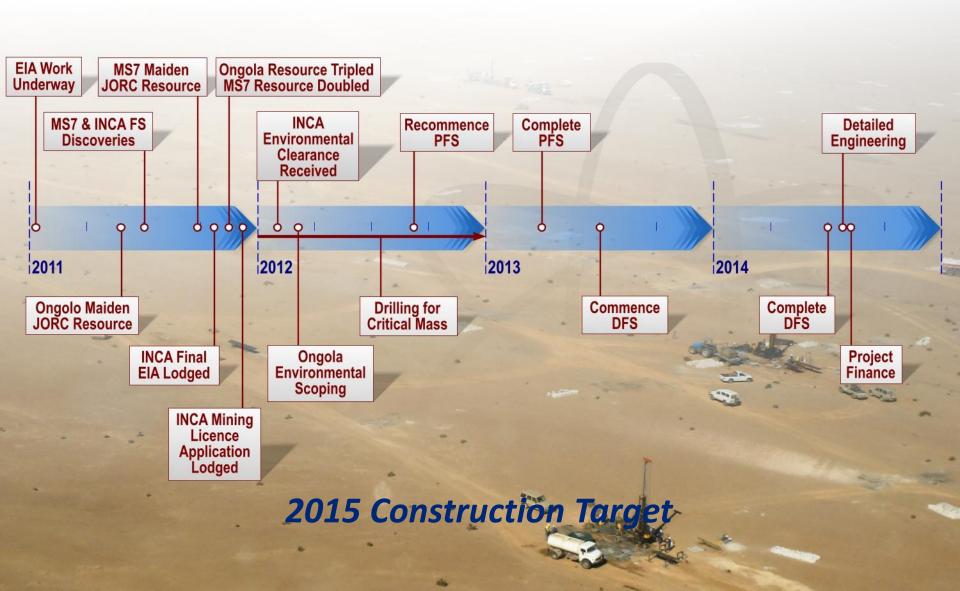

...the resource base continues to grow...

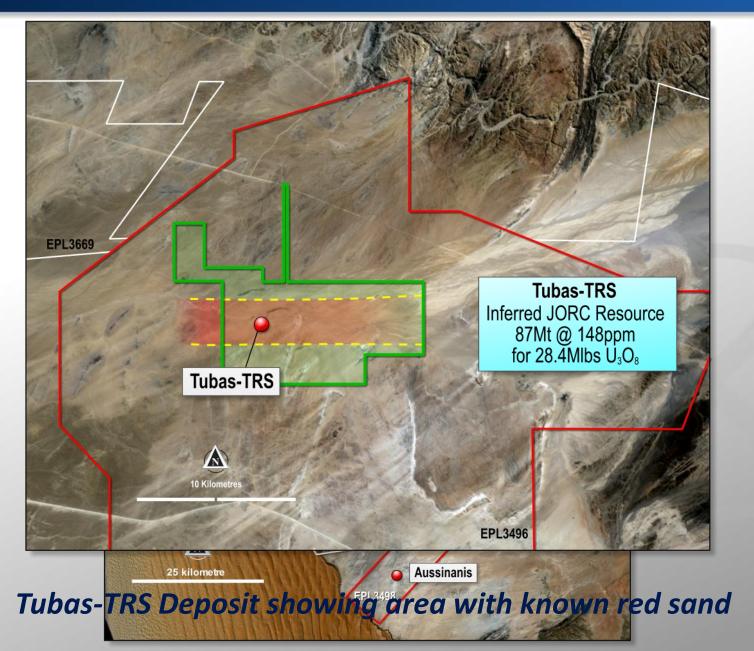

### Omahola Project Timeline

## **Tubas-TRS Project Location**

## **Tubas-TRS Project Basics**

#### **Deposit Characteristics:**

- Well-sorted windblown sand, low grade uranium
- Free flowing/weakly consolidated
- Large area along the Tubas palaeochannel
- Bulk of uranium in sub 20 μ fraction
- Uranium mineral almost exclusively carnotite
- \* At~150 ppm, generally considered uneconomic

#### **Objective:**

Concentrate maximum uranium in minimum volume through physical beneficiation to enhance economics

## **Tubas-TRS Project Schauenburg Solution**

(III)

 $(\Pi)$ 

Hydrocyclone Schematic

#### **Process:**

Hydrosort®- II → Scrubbing → Hydrosort®- I → 3 X Hydrocyclones

#### Successful Pilot Plant Test:

- Simple process
- Uranium Recovery >80%
- Carbonate reduction >80%
- Mass pull between 10% ~ 20%
- Uranium upgrade factor 7.9 (at 10% mass pull)
- Process guarantee offered
- Product is easily leached (pH 2.5) and loaded onto resin
- New resource estimate and environmental clearance obtained

The new resource, combined with the successful testwork, enables the TRS Deposit to be a standalone project

## Tubas-TRS Project Standalone Strategy

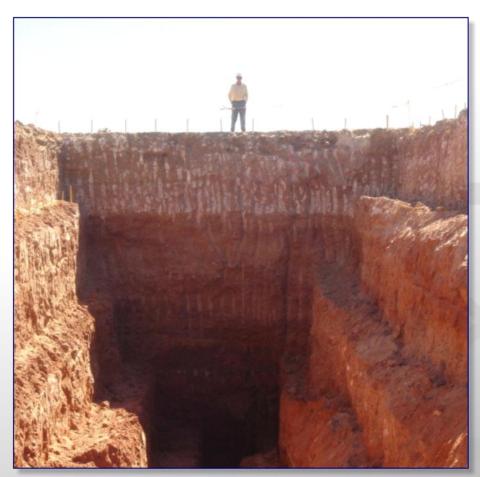

- Develop sand mining operation with Schauenburg Plant
- Construct Resin-In-Leach Circuit on the INCA MLA
- Produce loaded resin for sale to existing producers
- Small columns transportable by truck
- Schauenburg plants are modular, ~ 250 tpa U₃O<sub>8</sub> per module
- Allows gradual up scaling
- Indicative Capital Cost from initial Scoping ~ U\$135 M for 1,000 tpa U₃O₃ plant (Schauenburg Plant & RIL Circuit)
- Smaller start up planned

Offtake arrangement with an existing producer reduces technical risk and time to commence production

# Tubas-TRS Project Bulk Sample

Trench for Bulk Sample

Spoil Pile

# **Tubas-TRS Project Separation Testwork**

**Pilot Plant** 

**Mineral Liberation** 

## Tubas-TRS Project Leach Testwork

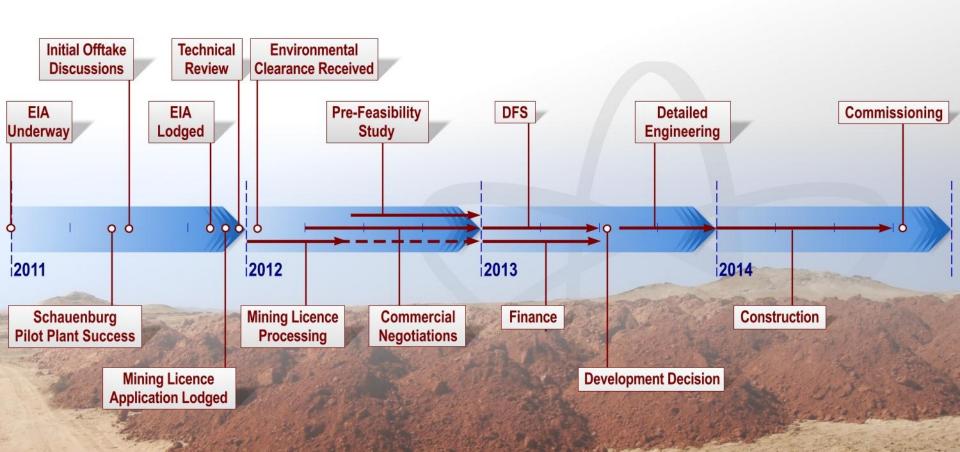

Successfully Loaded IX Resin @ pH 2.5

## Tubas-TRS Project Timeline

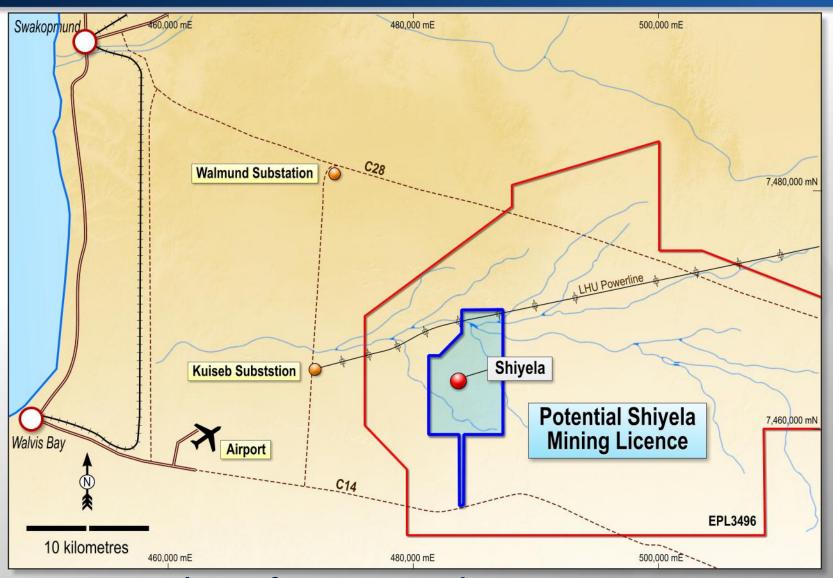

Aggressive timetable to 2015 production

## Shiyela Iron Project Location

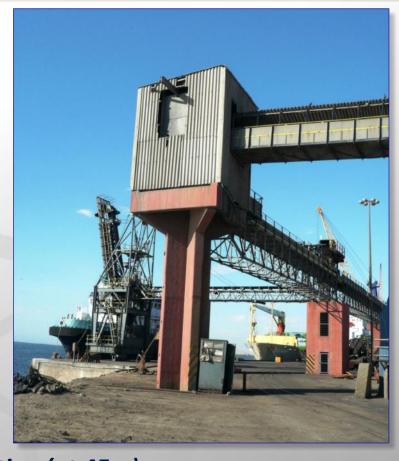

Clear Infrastructure advantage – power and 45 kilometres by road from Walvis Bay port

## Shiyela Iron Project Overview

- Close to Infrastructure
- Low strip ratio
- Competitive Capex
- Fast track development
- Exploration upside
- Outstanding coarse product
  - 150 μ Blast Furnace Grade

#### Shiyela Quality Specification (at 45 µ)

Deposit	Fe %	SiO <sub>2</sub> %	Al <sub>2</sub> O <sub>3</sub> %	Р%	S %	LOI %
M62	70.22	0.74	0.89	0.007	0.011	-3.07
M63	69.56	0.64	0.73	0.008	0.002	-3.12

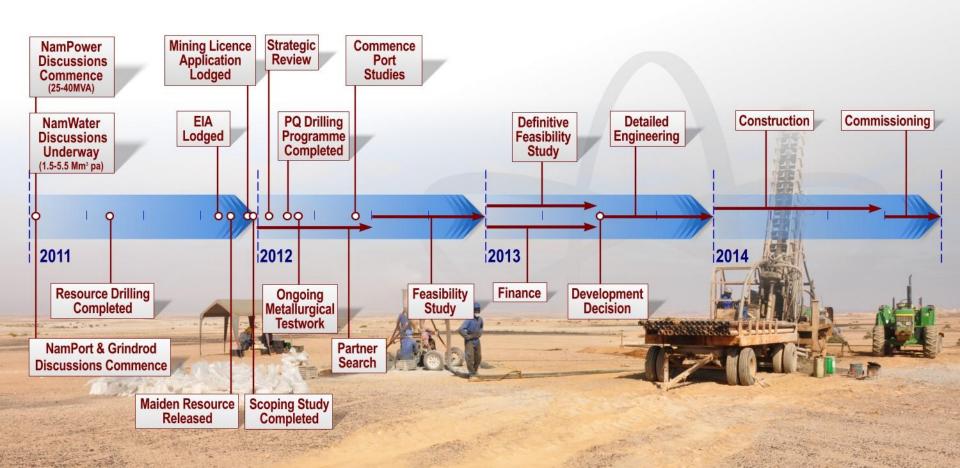

## Shiyela Iron Project Status

- Golder Associates (Perth) JORC resource
  - 78.7Mt at 18.8% Fe at a 16.6% DTR
- ProMet (Perth) completed Scoping Study
  - Capex: U\$467 M
  - Capex includes U\$50 M for Hematite Circuit
  - Includes U\$110 M for power & water
  - Opex: U\$77.40/ton
- Project Status:
  - Discussions ongoing with Namport, Grindrod, NamWater and NamPower
  - PQ drilling campaign completed for 16 tonnes of sample
  - Partner search underway

## Shiyela Iron Project Timeline

On a Fast Track....

### Conclusions

- DYL is ideally positioned with two advanced stage uranium projects in Namibia:
  - The Omahola Project is the last remaining independent Namibian project with grades above 400 ppm U3O8. Its resource base continues to grow rapidly with ongoing exploration success.
  - The Tubas-TRS Project can bring earlier cashflow but can also supply the Omahola Plant.
- The successful conclusion of the Shiyela partner search will accelerate project development and allow DYL to focus fully on its high quality uranium portfolio.

A leader in Namibia, consistently delivering outstanding results

### Namibian Uranium Mines and Projects

## Marenica – Marenica Energy Limited (100 ppm cut-off)

196 Mt @ 169 ppm: 73 Mlbs

#### Trekkopje – Areva

(100 ppm cut-off)

335 Mt @ 149 ppm: 110 Mlbs

#### Valenica – Forsys Metals

(67 ppm cut-off)

176 Mt @ 156 ppm: 61 Mlbs

#### Rossing – Rossing Uranium Limited

(100 ppm cut-off)

246 Mt @ 252 ppm: 137 Mlbs

#### **Husab – Extract Resources Limited**

(100 ppm cut-off)

241 Mt @ 480 ppm: 257 Mlbs

#### Etango – Bannerman Resources Limited

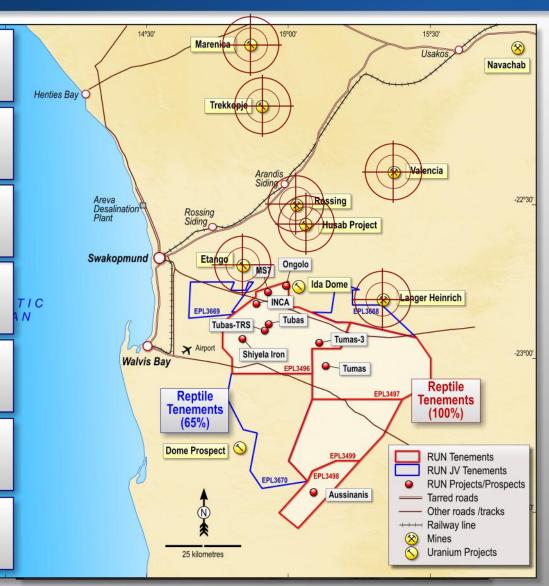

(100 ppm cut-off)

336 Mt @ 201 ppm: 149 Mlbs

#### Langer Heinrich – Paladin Energy Limited

(250 ppm cut-off)

110 Mt @ 550 ppm: 134 Mlbs

Is size the only criteria?

## DYL's Uranium Project Criteria

#### Grade:

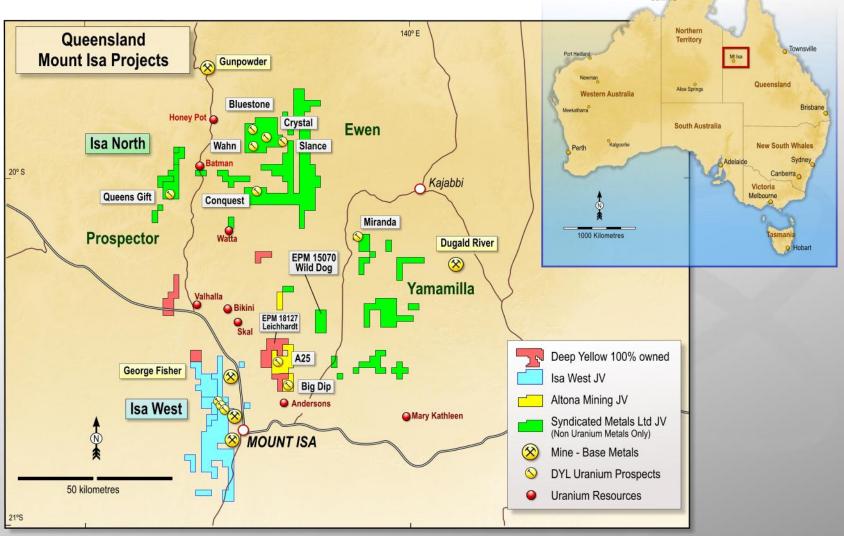

- ~300ppm U<sub>3</sub>O<sub>8</sub> for palaeochannel and sheetwash calcretes
- ~400ppm U<sub>3</sub>O<sub>8</sub> for hard rock open pit deposits (alaskites)
- ~1,000ppm U<sub>3</sub>O<sub>8</sub> for potential underground deposits
- Minimum 18Mlbs U<sub>3</sub>O<sub>8</sub> per deposit with upside (15 yr mine life)
- Minimum production profile ~2.2Mlbs per operation
- No refractory uranium minerals
- Resource inventory ~100Mlbs U<sub>3</sub>O<sub>8</sub>
- Use physical beneficiation for unique low grade sand deposit

Rational economics drives exploration and project decision making

### Australia - Queensland

#### Almost 1,700 km<sup>2</sup> exploration area: 4.8 Mlbs in resources

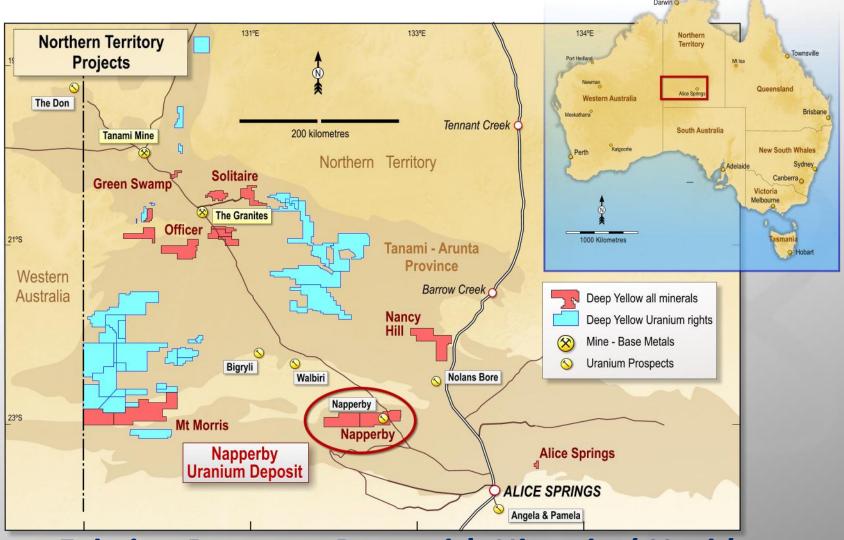

Exploration Success with increased high grade JORC....

## Australia – Northern Territory

Over 23,000 km<sup>2</sup> exploration area: 7.4 Mlbs in resources

Existing Resource Base with Historical Upside....

# JORC Resource Summary – March 2012

Deposit	Category	Cut-off (ppm U₃Oঃ)	Tonnes (M)	U3O8 (ppm)	U₃O8 (t)	U3O8 (MIb)

### **JORC Compliance Statements**

#### Namibia

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Leon Pretorius, a Fellow of the Australasian Institute of Mining and Metallurgy. Dr Pretorius, Managing Director of Reptile Uranium Namibia (Pty) Ltd has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Pretorius consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to the **Ongolo, MS7 and INCA** Mineral Resources is based on work completed by Mr Neil Inwood and Mr Doug Corley. Mr Inwood is a Fellow of the Australasian Institute of Mining and Metallurgy and Mr Corley is a member of the Australian Institute of Geoscientists. Messrs Inwood and Corley have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Persons as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Messrs Inwood and Corley consent to the inclusion in the report of the matters based on his information in the form and context in which it appears. Messrs Inwood and Corley are full-time employees of Coffey Mining.

The information in this report that relates to the **TRS** and **Tubas** Mineral Resource is based on information compiled by Mr Willem H. Kotzé Pr.Sci.Nat MSAIMM. Mr Kotzé is a Member and Professional Geoscientist Consultant of Geomine Consulting Namibia CC. Mr Kotzé has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Kotzé consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

The information in this report that relates to the **Aussinanis and Tumas** Mineral Resources is based on work completed by Mr Jonathon Abbott who is a full time employee of Hellman and Schofield Pty Ltd and a Member of the Australasian Institute of Mining and Metallurgy. Mr Abbott has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' and as a Qualified Person as defined in the AIM Rules. Mr Abbott consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

#### Queensland

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Martin Kavanagh, a Fellow of The Australasian Institute of Mining and Metallurgy. Mr Kavanagh is an Executive Director of Deep Yellow Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Kavanagh consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to the Queensland Mineral Resource is based on information compiled by Mr Neil Inwood. Mr Inwood is a Member of The Australasian Institute of Mining and Metallurgy. Mr Inwood is employed by Coffey Mining Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Inwood consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

#### **Northern Territory**

The information in this report that relates to the **Napperby Project** Mineral Resource is based on information compiled by Mr Daniel Guibal who is a Fellow (CP) of the Australasian Institute of Mining and Metallurgy. Mr Guibal is a full time employee of SRK Consulting and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Guibal consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Where eU3O8 values are reported it relates to values attained from radiometrically logging boreholes with Auslog equipment using an A675 slimline gamma ray tool. All probes are calibrated either at the Pelindaba Calibration facility in South Africa or at the Adelaide Calibration facility in South Australia.

### JORC Resource Summary – March 2012

#### **SHIYELA (NOVEMBER 2011)**

Deposit	Category	Cut-off (DTR%)	Tonnes (M)	DTR (%)	Fe (%)
